Why Investing in Digital Brand Protection

88%

of companies now consider cybersecurity a critical business risk

Gartner

\$4.45M

is the average cost of a data breach in 2024, a 15% surge in just three years

IBM

100+

countries have laws imposing a personal liability on executives for a data breach

ImmuniWeb

Digital Brand Protection helps combat online threats like counterfeiting, copyright infringement, and malicious content. By actively monitoring the internet and taking swift action against these issues, you protect your brand's image, prevent financial losses, and maintain consumer trust.

Efficient. Simple. Cost-Effective.

Combined with our attack surface management technology, our digital brand protection offering rapidly brings to your attention cyber- and typo-squatting domains, ongoing phishing campaigns, fake accounts in social networks, and malicious mobile applications imitating your corporate brand or usurping your identity.

Just enter your company name to launch the continuous monitoring of cyber risks and threats on the Internet including Dark Web. Detect fraudulent websites that imitate your branded design or misuse your corporate logo for fraudulent, unwarranted or illicit purposes. Spot copyright and trademark infringements as soon as they occur with our award-winning digital brand protection technology.

Enjoy a fixed monthly price per company regardless the number of your domains, security incidents or phishing campaigns. Customize instant alerts to relevant people in your DFIR or legal team. Leverage our API to synchronize the digital brand protection data flow with your internal systems, such as SIEM, or just export the findings into a PDF or XLS file. Our security analysts are here to help may you need additional details, investigation or support.

Trusted by 1,000+ Global Customers
